Presents:

Safety Tips for Kids

Just like the safety rules you learn about crossing the street and looking both ways, there are other important safety rules that can help you in all sorts of situations.

1. Use the buddy system when ever you are away from home - always keep a friend with you wherever you go.
2. If someone is doing something they shouldn't or tries to hurt you, tell them to STOP, then tell your parents or tell someone you trust.
3. Use your courage to speak up. Everyone has courage and the more you use it, the more it works for you.
4. Be assertive and confident – it makes it harder for someone to take advantage of you.
5. Trust your instincts. If something doesn't seem right, it probably isn't and it is best to avoid that situation.
6. You never have to keep a secret from your parents. Tell them if something happened that upset or scared you.
7. Don't ever give out personal information over the internet. Don't tell people your name, phone number, school or address, or even the state you live in.
8. You are a special person and deserve to be safe!
